| 96+ lbs. Dose: 400 mg | N/A | 4 tsp | 8 | 4 | 2 |

*Use caution when first introducing your kid to chewables, which can be a choking hazard. Make sure they take their meds sitting up and chew them completely before getting up or running around.

**When introducing your kid to swallowable tablets, it's a good idea to practice first with small pieces of candy, like Tic Tacs or Nerds.
